

## RelativityOne Redact

The industry's most comprehensive redaction capabilities – now automated and integrated into our simply powerful platform.

As regulations expand and requests for information skyrocket, there is more need than ever to accurately apply the redactions that protect personally identifiable information (PII) during e-discovery, investigations, and data request processes, ensuring adherence to evolving privacy regulations for organizations around the globe.

With RelativityOne Redact, automated redaction capabilities are now at your fingertips at no additional cost. Apply location-based, term-based, or complex (RegEx, rules, etc.) image and native redactions over millions of pages.

### An Industry Leader

The technology behind Redact is used to apply more than 500 million redactions every year.

### Save Time

Automated and integrated redaction capabilities streamline processes for you and your teams.

### Reduce Risk

Avoid the financial, operational, and reputational risk associated with human error in applying redactions.

### Foreign Language Support

Redact supports over 100 languages. Set up rules for Excel and PDFs to add foreign characters as needed.
